Name (and buggy img)

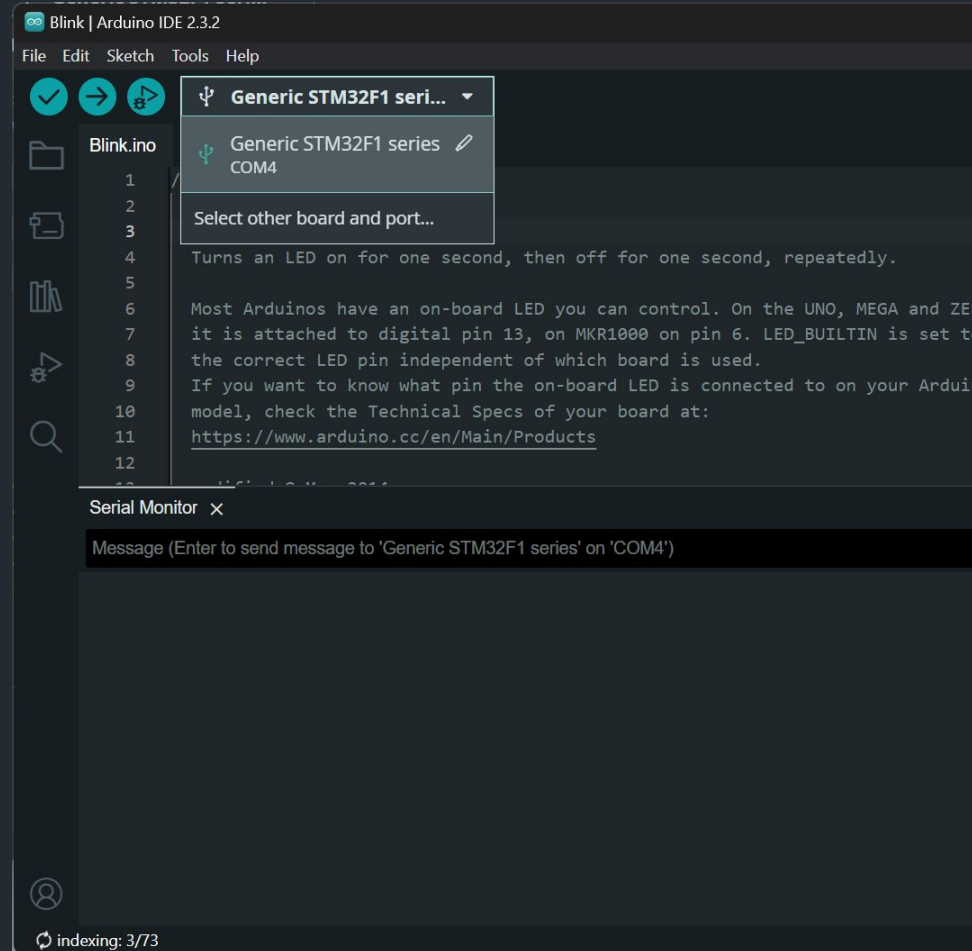

USB

Open the Serial Monitor software of your choice. For ease of use, Arduino IDE can be preferred.

www.Arduino.cc

From the Tools menu, select the port where the badge is connected.

Press BTN3 on the badge to start the USB interface

Operations

Issue

At 10am we will issue each table the following, where **Each person should get**

1 x Badge

1 x Wire

1 x OLED

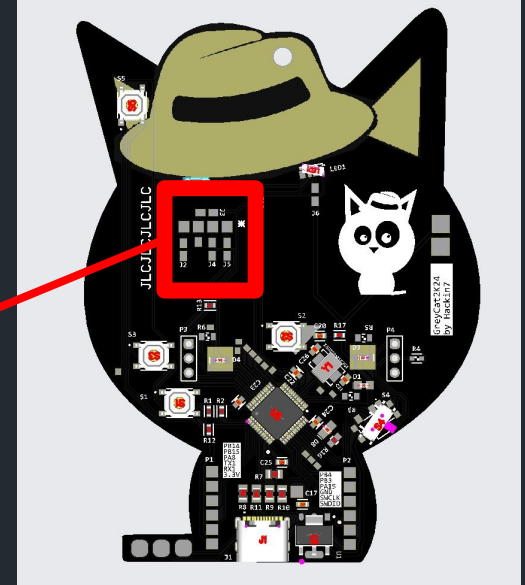

Assembling with OLED

1. Bend the OLED Pins 90 degrees using Pliers
 - a. We can loan pliers at the Hardware Debugging Booth
2. Put into the header on the badge

OLED is NOT NECESSARY to solve the challenges

Header

URGENT

Make sure

1. Your computer can detect the Badge (COM Port)
2. Each Table has at least 2 Functioning badges and 2 Wires (Hint Hint)

Others

Make sure

1. OLED is working - can display Text
2. LEDs are working (can try changing modes)
3. Batteries are working

Go and find
Terence at the
Hardware Booth

Others

Just don't be stupid

1. We are NOT responsible for any damage you do to your badge
2. Stupid things include: connect 5v to GND, pull out the battery wires
3. If you do something troll, we reserve the right not to flash back the CTF

Challenges

No Soldering here for participants (no approval so sadge)

We seek your understanding if we have technical difficulties

1. I soldered, and programmed every single board in the past 3 days so
2. Hope i didn't screw up the firmware haha

**Remember to press BTN3 to
start the CTF challenges**

GreyCat!
